Catalogue of Public Documents

Printed During the Month of July, 1895

WHERE DOCUMENTS ARE OBTAINABLE

It is the apparent intention of the new printing law (approved January 12, 1895) that the sales of public documents shall ultimately be concentrated mainly if not wholly in the office of the Superintendent of Documents. The provisions that 500 copies of each of the various departmental publications of every kind, as well as of the numbered Congressional documents, shall be sent to him (sec. 58); that all the accumulated documents in the Departments not needed for official use be sent to him now and annually (sec. 67); that any public officer having documents for sale may turn them over to him (sec. 61);—all point to such an intention. But thus far the law has been only partially operative. No public officer has desired to be relieved of the sale of books sufficiently to induce him to turn them over to this office. The collection of the accumulations from the Departments has not much more than begun. The decision whether 500 additional departmental publications shall be printed for this office or 500 shall be deducted from the departmental editions has not been made. Consequently many of the current documents noted in the Monthly Catalogue can not be supplied by this office, while of the older documents, of which many thousands are here on sale, no catalogue can be furnished. Thus the selling function of the office of the Superintendent of Documents is comparatively undeveloped. But its development is progressing steadily, if not rapidly, and in the fullness of time all the results contemplated in the passage of the law by which this office was created may be realized.

The arrangements for disposing of public documents which existed before the passage of the new law are still in operation. They are extremely varied, and before the advent of the Monthly Catalogue no attempt had been made to collect them and make a combined statement for the benefit of general buyers. It is believed that the following statement describes most of their important features. It is made, however, subject to correction as further information may be received.

The volumes of Decisions of the Supreme Court of the United States, perhaps the most important of all public documents, have never been published by the Government. They are published by the official reporter of the Court, through a private publishing house. There is a statutory provision that a number of copies, amounting to 300 in all, shall be furnished to various departments of the Government at $2.00 per volume, and that the price to the public shall not exceed $5.00 per volume. The cases in suits to which the United States are a party are also printed by contract at a private printing house. Only those documents of the Supreme Court which are printed at the Government Printing Office are noted in this Catalogue, and they are but a small part of the whole. They are printed in very limited editions for the use of the Court and attorneys, and no provision is made for their distribution or sale. By far the greater part of the publications used in the proceedings of the Court are printed by private litigants at their own cost. Occasionally, when a litigant pleads poverty, the Court makes an order that his printing shall be done at the Government Printing Office at public expense.

The documents of the Court of Claims are printed at the Government Printing Office, but only for the use of the Court and in very limited editions. They are not accessible to the public except by consent of the attorneys in interest. The Court makes an annual report to Con-

gress, which is a public document, and its reports are printed in annual volumes, of which only a limited edition, for official use, is issued by the Court. Private publishers, however, may, and usually do, order from the Public Printer separate editions, which they offer for sale.

Senators and Representatives in Congress have allotments, varying in number, of nearly all kinds of Government publications, which are distributed on their order from the Senate and House folding and document rooms. Documents can often be obtained more promptly and cheaply by application to Members of Congress than to the Departments.

The Department of State sells the Revised Statutes, Statutes at Large, and pamphlet laws. Address Disbursing Clerk, Department of State. If drafts are sent, make them payable to his order.

The Bureau of the American Republics sells its own monthly bulletins, handbooks, etc., at from 10c. to 50c. Address the Director of the Bureau.

The weekly Catalogue of Copyrights, prepared by the Librarian of Congress, is published by the Department of the Treasury, but is not sold by that Department, nor by the Librarian. Those desiring it must subscribe at the office of the collector of customs for the district in which they live. The price is $5.00 a year.

The Charts, Coast Pilots, and Tide-tables of the Coast and Geodetic Survey are sold at the office of the Survey, in Washington, and also by one or more sales agents in each of the important American seaports. The monthly Notice to Mariners may be had free at these agencies, at all United States custom-houses, at the branch hydrographic offices of the Navy Department, and at the office of the Coast Survey

The Abstract of Sanitary Reports, issued weekly, showing health conditions in various parts of the country as reported by the officers of the Marine Hospital Service and others, is for gratuitous distribution, but the edition is limited, and the document is intended only for health officers and other persons interested in sanitary affairs. To obtain it application should be made to the Supervising Surgeon-General of the Marine-Hospital Service, Treasury Department.

The volumes of the Records of the War of the Rebellion are sold by the Department of War at 50c. to 85c. per volume. Address Maj. George W. Davis, War Records Office, Department of War.

The Post-Office Department sells the post-route maps, of which new editions are issued four times a year, corrected to the 1st day of March, June, September, and December. Orders should be addressed to the Disbursing Clerk, Post-Office Department, and money orders should be made payable to him.

The Official Postal Guide is sold by George F. Lasher, the contractor for the printing, No. 147 Tenth street, Philadelphia.

The Secretary of the Navy will sell the surplus copies of the Official Records of the Union and Confederate Navies after the distribution ordered by law has been made. No copies are now available from this source and none may be for years to come. Only one volume has thus far been published. A few copies of that, in sheep binding, may be had from the Superintendent of Documents at $1.40 per copy. The officer in immediate charge of the publication, to whom inquiries may be addressed, is the Superintendent of Naval War Records, Navy Department.

The Charts, Sailing Directions, etc., of the Hydrographic Office of the Department of the Navy are sold by the Office in Washington, and also by agents at the principal American and foreign seaports and American lake ports. Copies of the weekly Notice to Mariners, weekly Hydrographic Bulletin, and monthly Notice to Mariners for the Great Lakes are supplied free on application at the Hydrographic Office in Washington and at the branch offices in Boston, New York, Philadephia, Baltimore, Norfolk, Savannah, New Orleans, San Francisco, Portland (Oreg.), Port Townsend, Chicago, and Cleveland. The same offices also supply the Light List and the Beacon and Buoy List issued by the Light-House Board.

It should be noted that there are four kinds of Notices to Mariners—one issued at frequent but irregular intervals by the Light-House Board (Treasury Department); one issued monthly by the Coast Survey (Treasury Department); and two by the Hydrographic Office (Navy Department), one of these last being weekly for the ocean and the other monthly for the Great Lakes.

The Nautical Almanac and other astronomical publications are sold by the Superintendent of the Nautical Almanac, Department of the Navy, and by agents of the Nautical Almanac office in New York, Philadelphia, Boston, New Orleans, Portland (Oreg.), Baltimore, San Francisco, London, Paris, and Berlin. The price of the Almanac is $1.00, and it is issued three years in advance. Paper-covered editions are sold for half this price by the agents, but only the cloth edition is sold by the office itself.

The Decisions of the Department of the Interior in land cases and in pension cases are issued in slips and signatures at 10c. each, and in bound volumes at prices ranging from $1.05 to $1.45 per volume. Subscribers may deposit $1.00, either in the Department or in the Pension Office or the General Land Office, and receive the contents of a volume of the Decisions in separate parts as they appear. Of the Land Decisions usually two volumes are issued yearly, while the Pension-Decision volumes appear at longer intervals, sometimes more than two years apart.

Orders for the publications of the Tenth and Eleventh Censuses (1880 and 1890) should be sent to the chief clerk of the Department of the Interior, indorsed "Document Division."

The various bureaus of the Department of the Interior have extensive and important lists of publications, which may be ordered from the Department or directly from the bureaus. These include the issues of the Pension, Patent, and Land offices, the Geological Survey, and the Bureau of Education.

The publications of the Geological Survey include annual reports, monographs, bulletins, and atlases, which cost from 25c. to $4.50 each. Address the Director of the Survey, Washington.

The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 10c. and the latter at $10.00. For certified copies of Patents, including specification, drawing, certificate, and grant, the price is 85c. The weekly Official Gazette is sold at 10c. a copy or $5.00 a year. It contains lists of the new patents, numbering about 450 a week. A variety of indexes, giving a complete view of the vast work of the office from 1790 to date, are published at prices ranging from 25c. to $10.00 per volume. The Rules of Practice and pamphlet Patent Laws are furnished free. Sets of the specifications and drawings of patents will be furnished to any public library which will pay transportation on them, provide proper custody, make them conveniently accessible to the public, and bind them to correspond with the bound volumes in the Patent Office. The Patent Office issues coupon orders, ten for $1.00, each of which will be received for one specification and drawing or for one copy of the Official Gazette. They are good until used. Address the Chief Clerk, Patent Office.

Such publications of the Bureau of Education as are in print may be had gratuitously by addressing the Commissioner of Education.

The General Land Office publishes separate State maps of the States in which public lands are to be found, and also a large general map of the United States, said to be the best map of the country published, which is sold at $1.25. Address the Commissioner of the General Land Office.

The publications of the Department of Agriculture are for free distribution, except those of the Weather Bureau, which are sold. The Department has no list to which all its publications are sent. It issues a monthly list of publications, which is mailed to all applicants, enabling them to select such reports and bulletins as interest them, which will be mailed to them on receipt of their application therefor by the Secretary of Agriculture. For the publications of the Weather

Bureau, however, application should be made to the Chief of that Bureau. The serial publications of the Department are not intended for general distribution. Requests for them are referred to the divisions from which they are issued, and instructions are then sent as to how the publications may be regularly secured.

There are two Bureaus of Statistics—one in the Department of State, which issues the monthly Consular Reports, and the other in the Department of the Treasury, which issues the Monthly Statements of Finance, Commerce, and Immigration. There is also a Division of Statistics in the Department of Agriculture, which issues the monthly Crop Report.

In its latest published catalogue and price list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution consist of Contributions to Knowledge, Miscellaneous Collections, and annual reports. No sets of these are for sale. The edition of volumes of Contributions and Collections is limited, and is distributed to designated public libraries and to learned institutions in this country and abroad. A small edition of some of the papers in the above publications is printed for sale or exchange. Those at present available are enumerated in the accompanying list. For reports of the Institution or of the National Museum application should be made to Members of Congress. For reports, etc., of the Bureau of Ethnology application should be made to Members of Congress or to the Director of the Bureau." The "accompanying list" contains 479 titles, of which 222 are priced at from 2c. to $7.50 each. The annual report is the only Smithsonian publication that is a public document. All the others are paid for from the private funds of the Institution.

The publications of the Department of Labor and the Fish Commission are distributed gratuitously through the heads of those Bureaus and through Members of Congress, but they are in so much demand that back numbers are scarce and difficult to obtain, while complete sets are practically unattainable.

The Interstate Commerce Commission sends its reports free to all applicants.

The Government Printing Office sells the Monthly Statements of Finance, Commerce, and Immigration, compiled by the Bureau of Statistics of the Department of the Treasury; the Congressional Record, from the beginning of the Fiftieth Congress to date; the set of State Constitutions and Colonial Charters; Poore's Descriptive Catalogue of Government Publications; the Reports of the Fish Commission; the Reports on the Paris Exposition; the Catalogue of the Library of the Surgeon-General's Office; the Polaris Arctic Expedition; Hall's Arctic Expedition; Treaties and Conventions between the United States and other Powers, 1776–1887; Second and Third Annual Reports of the Geological Survey; Fishing Industries of the United States, five volumes; Report of Silver Commission, 1876; International Monetary Conference, 1881; and United States Infantry, Cavalry, and Artillery Drill Regulations.

Remittances to the Public Printer should be made always by postal money order. The Geological Survey and the War Records Office will receive currency as well as postal orders if the exact amount be sent. The State Department will receive drafts on New York or Washington banks, as well as money orders or currency. None of the Departments or Bureaus will receive individual checks or postage stamps in payment for books.

All the Government offices which have books for sale issue price lists, which will be sent free to all applicants. Except for some of the publications of the Hydrographic Office, the prices charged are never more than cost and 10 per cent added, and frequently much less than that.

All public documents, from whatever Department or Bureau they may be bought, will be forwarded to the purchaser free of postage.

The provision of law as to the publication and distribution of this Monthly Catalogue is that "2,000 copies shall be printed in pamphlet form for distribution." There is no direction as to who shall make the distribution nor to whom it shall be made. Thus far the Superintendent

of Documents has exercised his own discretion in the premises. In pursuance of this discretion copies of each issue have been sent to the Senators, Representatives, and Delegates of the Fifty-fourth Congress, to the designated depository libraries, to those Government Departments, Bureaus, and offices that issue public documents, to the officers of the Engineer Corps, U. S. A. (by request of the Chief of the Corps), and, finally, to those citizens who have asked for them. No arbitrary list of names of people who have expressed no interest in public documents has been made up. Only those unofficial citizens who were known to want the Catalogue have been supplied with it. By pursuing this course, the small edition has thus far been saved from entire exhaustion, and it is still possible to send all the numbers free of charge to those who ask for them. It is probable, however, that it will soon be found necessary to adopt some more restrictive rule than that of "first come, first served," which has thus far been followed. Requests for Catalogues have been received from every part of this country and from several foreign countries, and every mail brings an increasing number of such requests. This statement is made in answer to inquiries for information as to the method of publication and distribution of the Catalogue.

SALES OF PUBLIC DOCUMENTS

Section 61 of the act providing for the public printing and binding and the distribution of public documents, approved January 12, 1895, provides as follows:

"The Superintendent of Documents is hereby authorized to sell at cost any public document in his charge, the distribution of which is not herein specifically directed, said cost to be estimated by the Public Printer and based upon printing from stereotyped plates; but only one copy of any document shall be sold to the same person, excepting libraries or schools by which additional copies are desired for separate departments thereof, and Members of Congress; and whenever any officer of the Government having in his charge documents published for sale shall desire to be relieved of the same, he is hereby authorized to turn them over to the Superintendent of Documents, who shall receive and sell them under the provisions of this section."

In accordance with the foregoing provisions, prices are fixed on the documents named in the Catalogue. In those cases where publications are offered for sale by the Departments issuing them, and price lists have been issued, those prices have been adopted here. In other cases the prices have been computed on the basis fixed in the law as above quoted. In all cases these computed prices call for paper or cloth covers, and a corresponding increase will be made for books bound in leather or half leather. The cost of paper covers is about 1c. per volume; of cloth cases, from 10c. to 30c. per volume; of full sheep binding, from 75c. to $1.15 per volume for octavos and $1.50 for quartos; of half russia or half turkey, $1.00 per volume.

AUTHORITY FOR PUBLICATION

This Monthly Catalogue is issued in accordance with the provisions of section 69 of the act hereinbefore quoted, which is as follows:

"SEC. 69. A catalogue of Government publications shall be prepared by the Superintendent of Documents on the first day of each month, which shall show the documents printed during the preceding month, where obtainable, and the price thereof. Two thousand copies of such catalogue shall be printed in pamphlet form for distribution."
